

SPECIFICATION SHEET: S060

Classroom Treasure Locker

Dimensions:

Height	Width	Depth
340 mm	200 mm	300 mm

Personalised and functional lockers for seven to eleven year olds.

Sturdy Construction	Door frame constructed from heavy gauge mild steel of press formed channel section.
Door Strength	Two 'five knuckle' hinges.
Style	Attractive and functional locker with five door designs.
Colour	Automated paint plant ensures consistent high quality finish in a wide range of modern colours.
Function	These lockers can be hung from walls, stacked together, pushed under tables or used as a stool. Light enough for children to carry.

Detailed Product Specification

Nesting:	All 'Classroom Treasure' lockers are drilled in sides, tops and bottoms, to enable them to be bolted together into configurations to suit the user.
Construction:	Spot welded and pop riveted.
Material & Finish:	Mild steel-stove enamelled (see Finish specification).
Door Frame Assembly:	Comprising two uprights manufactured from heavy gauge mild steel of press formed channel section and a top frame cross member. Spot welded construction produces a rigid frame enabling door clearances to be maintained in accordance with British Standard requirements. There is a continuous vertical Door Stop integrated into the Left Hand frame upright.
Doors:	Doors are attached to the right hand side of the doorframe with two 'five knuckle' semi-concealed hinges. The door comes as standard with 'postbox' cutout and two arched windows with Acrylic on the inside of the door. Other shape windows or a plain door can be supplied at additional cost.
Numbering:	A laminate plastic plate, which is featured on the top middle of the door in black with white numbering, is the standard offering.
Locking:	Standard option is 3 number mastered combination lock. Any lock can be supplied at additional cost.
Paint Finish:	Five-stage Pre-treatment incorporating automatic degreasing and phosphate prior to painting providing improved adhesion and humidity resistance. Paint is applied by computer controlled high-speed electrostatic rotary bells to ensure the correct paint thickness is achieved. The component parts are then stove enamelled at the correct temperature to ensure a hard paint finish is achieved.
Carry Handle:	There are two carry handles (rubber) on either side of the locker for manoeuvrability.
Colour Range:	Standard locker frame stove enamelled colours is: "Ice". Standard door stove enamelled colours are: "Ice", "Rockpool", "Smoke", "Nimbus", "Forest", "Skye", "Kingfisher", "Royale", "Cherry". The Helmsman general brochure illustrates these colours. Exact colour samples are available.

OPTIONAL EXTRAS: The following can be supplied at an additional cost and, if included, will be specified in the quotation.

Colours: We can provide a quotation for different coloured doors

Designs: We can provide a quotation for different door windows (four squares, square, two rectangle) and a plain door option.

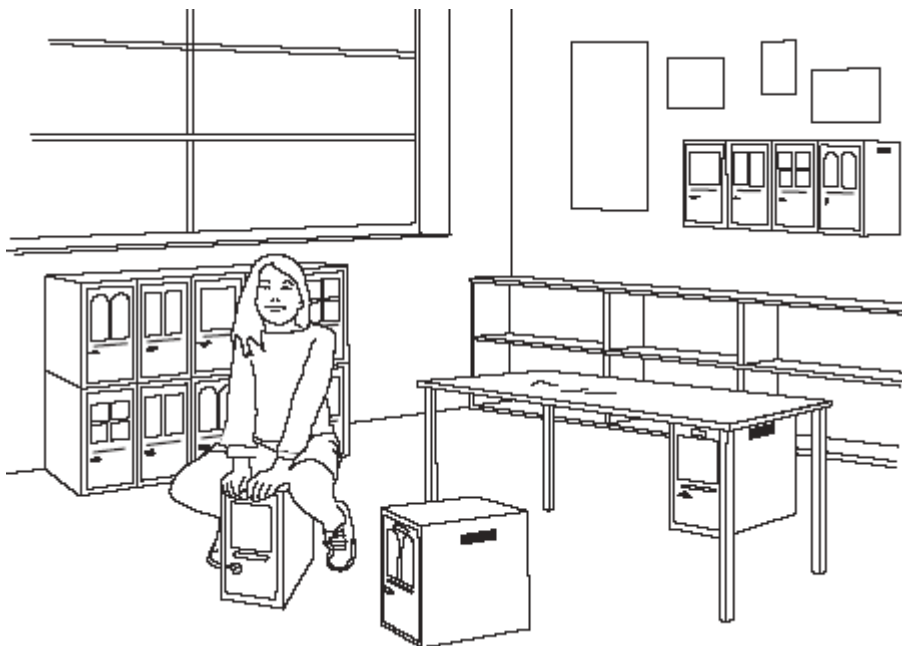

Locker naming: Plates can contain a name to personalise the locker.

Stands: Not designed but if it thought essential then one could be drawn.

Installation: Helmsman offers a full installation service for its products.

After Sales Service: All of our products are supported by the Helmsman Service Department who provide technical advice, maintenance schemes, prompt delivery of replacement keys/parts and product refurbishment.

- Health & Safety: If installed lockers must be firmly secured to wall or floor and fixed together in runs for safety purposes. If applicable, install in accordance with specific product instructions.
- All dimensions are nominal.
- To enable us to interpret your requirements accurately, please state at time of enquiry/order the choice of locker type, colour, locking and nesting arrangement and delivery requirement.
- The products described in this specification sheet herein are the subjects of patent, trademark, design and copyright protection or application thereof.
- In the interest of efficiency and service to our customers, the company reserves the right to modify the specifications of any of its products.
